**Abstract**—Purpose of this paper is to introduce an invention in working principle of Allopathic, Homeopathic, Ayurvedic system of Medicines, with Vaccination, Physical Exercise, Yogic Exercise and Meditation. Development and use of toxic substances from dead body of bad elements (bacteria, virus, fungus, parasite etc.) is very essence. This shows how minimum quantity of medicines recovers the diseases in a living being with the least side effects. It also explains how Physical Exercise, Yogic Exercise, Meditation etc., disease free condition can be prevailed. Perfect School of Medicines is designed keeping in view of medicinal as well as toxic substances effect derived from dead bad elements. The diagnosis of a disease with the progress of recovery from the disease can be determined by passing electromagnetic [EM] wave through the disease affected portion of the patient's body and measuring the difference between the going in and the coming out electromagnetic wave signal power from that portion of the body. This electromagnetic wave absorption examining method for a living body assigns a new testing technique for knowing the status of the body eliminating present pathological examination system.

**Index Terms**—Bad Elements-Bacteria, Virus, Fungus, Parasite etc., Electromagnetic wave absorption technique, Perfect School of Medicines, Toxic substances.

## I. INTRODUCTION

Every living body comprises with Good or Growth substances and Bad or Toxic substances [1]-[2]. Good substances may be termed as healthy or growth substances (GS) consisting of proteins, vitamins, minerals, water etc. Bad substances are termed as poisonous or toxic substances (TS) containing bacteria, virus, fungus, parasite etc. These healthy or growth substances (GS) are gradually decreasing after facing death by a living body and finally it is converted into bad or toxic substances (TS) only. We know that bad elements (bacteria, virus, fungus, parasite etc.), which cause disease in the living body, are also living creatures, because they can take part in reproduction. These type of disease caused bad elements like bacteria, virus, fungus, parasites etc. are searching the weaker section of the other living body, where they can be incremented (dwell and reproduced) for a period in their choiceable manner.

In every living body, there is immunity which safe guard the body from the certain attacks of these bad elements like bacteria, virus, fungus, parasite etc. These different types of immunology substances keep pace with the various parts of the body, e.g., brain, heart, spleen, liver, kidney etc. [1]-[2].

Whenever any of these immunology factors become less, that organ becomes weak and the organ is easily affected by the attack of the bad elements like bacteria, virus, fungus, parasite etc.

## II. LIVING BODY AND DEAD BODY

In case a disease appears in a living body, i.e., a living body is attacked by bacteria or virus or fungus or parasite or multiple of them and the disease is not cured within a specific time, that particular disease causes death to the affected living body by increasing the amount of bad or toxic substances more than good or growth substances. Thereafter remaining good substances (GS) is converted to bad or toxic substances (TS) in a dead body [1]-[2]. To be cure from the disease, generally we are taking help from medicines. If medicines fail to cure, i.e., to be free from bad elements (bacteria or virus or fungus or parasite), we have to go for surgical treatment. Surgery is nothing, but to curtail the main affected part of the living body, i.e., the main dwelling region of the so-called bad elements, causing damage to the organ. Most of the times it is seen that the surgical treatment is not the best method for complete cure, e.g., cancer treatment, different organs transplantation.

GS → Good or Growth Substances  
 TS → Toxic or Bad Substances

## III. ALLOPATHIC, AYURVEDIC, HOMEOPATHIC, YOGIC MEDICINES WORKING METHODOLOGY AND IMPACT ON LIVING BEINGS

Presently the most popular schools of medicines are Allopathic Medicine and Homoeopathic Medicine.

In Allopathic System, the significance (culture) of the bad elements like bacteria, virus, fungus, parasite etc. are studied with different substances such as chemical compounds, antibiotics, tree products, herbals etc. Thereafter the medicines are selected for the particular bad elements and finally the bad elements (bacteria, virus, fungus, and parasite) are killed or thrown out the affected living body by the application of certain amount of Allopathic medicines [1]-[2]. Generally we take the medicines in huge amount in Allopathic system. The death of huge number bad elements (bacteria, virus, fungus, parasite) produce large amount of toxic (poisonous) substances in the patient. These toxic substances cause ultimately damage to the other organs of the disease-affected body. Also the remaining living bad elements (bacteria, virus, fungus, parasite) gather high immunity to the medicines due to withstanding in large amount of toxin and unused medicines, thus later on the disease appears more malignant (violent) in nature. Again the remaining and other associated parts of the medicines, which are not used for killing or throwing out the bad elements, damage the organs of the patient. Hence the Allopathic medicines are not considered as the best school of medicines; particularly it is named as side affected medicines. But the very essence of using this system is that it gives an immediate curing affect, i.e., the patient is recovered from the disease within very short time, although he/she has to bear two side effects, namely one for unused medicines and the other for toxic substances released as a consequence of death or leaving of the bad elements such as bacteria, virus, fungus, parasite etc.

Ayurvedic system of medicines is working like Allopathic system. The only difference in Ayurvedic system is that the side effects due to excess medicines are little bit of less, since the most of the medicines are derived from trees and herbal products which are also natural living beings. Sometimes this excess unused medicines act as user friendly with the patient, but the toxic substances evolved from the dead body of the bad elements are remaining unused causing further side effects on the patient.

In Vaccination process, we introduce very small amount of the toxic substances derived from the dead bad elements (bacteria, virus, fungus, parasites) to a living body for increasing immunity for a long time against the sudden attack

of the living bad elements [1]-[2]. This works on the principle of killing or throwing bad elements (bacteria, virus, fungus, parasite) from the living body by the help of toxic (poisonous) substances present in the bad elements either in living or dead condition. Therefore it has been proved by Vaccination theory that the toxic substances derived from the bad elements can cause death to the living bad elements.

In Homoeopathic system, on the other hand, very small amount of medicines (say 0.0005 mgm daily) are applied. By that small amount of medicines, only a few numbers of bad elements (bacteria, virus, fungus, and parasite) can be killed or thrown out from the diseased person [1]-[2]. Let we consider only two number of living bad elements (bacteria, virus, fungus, parasite) are killed by the introduction of Homeopathic medicine, as a result the toxic substances will be produced from killing or dead body of the bad elements. Those toxic substances will take part for further killing or throwing out the rest bad elements as happening in chain reaction of a nuclear reactor. In Fig. 2, first Homeopathic medicine which is applied to the patient kills two bad elements named BE1 and BE2, now total body of BE1 and BE2 are converted to toxic substances (TS), these toxic substances from dead bodies of BE1 and BE2 will further kill two living bad elements named BE3 and BE4, so bodies of BE3 and BE4 are converted to all toxic substances (TS) which can take part for further killing rest living bad elements like chain reaction in Homeopathic system of medicines. Therefore all the dead bad elements take part to kill or throw out the living bad elements, and the toxic substances from the dead bad elements are utilized as medicine for recovering the disease caused by the bad elements.

In Homeopathic system the full utilization of the bad elements are implemented for recovery from the disease occurring in a living body. After recovery from the disease caused by the bad elements (bacteria, virus, fungus, and parasite), only few dead bodies of the bad elements are remaining present in the patient. The disease affected living body is not bearing any side effect due to very few dead bodies of the bad elements. Therefore this Homeopathic system enlightens a new technology to bring death (remove) living bad elements by the dead bad elements only.

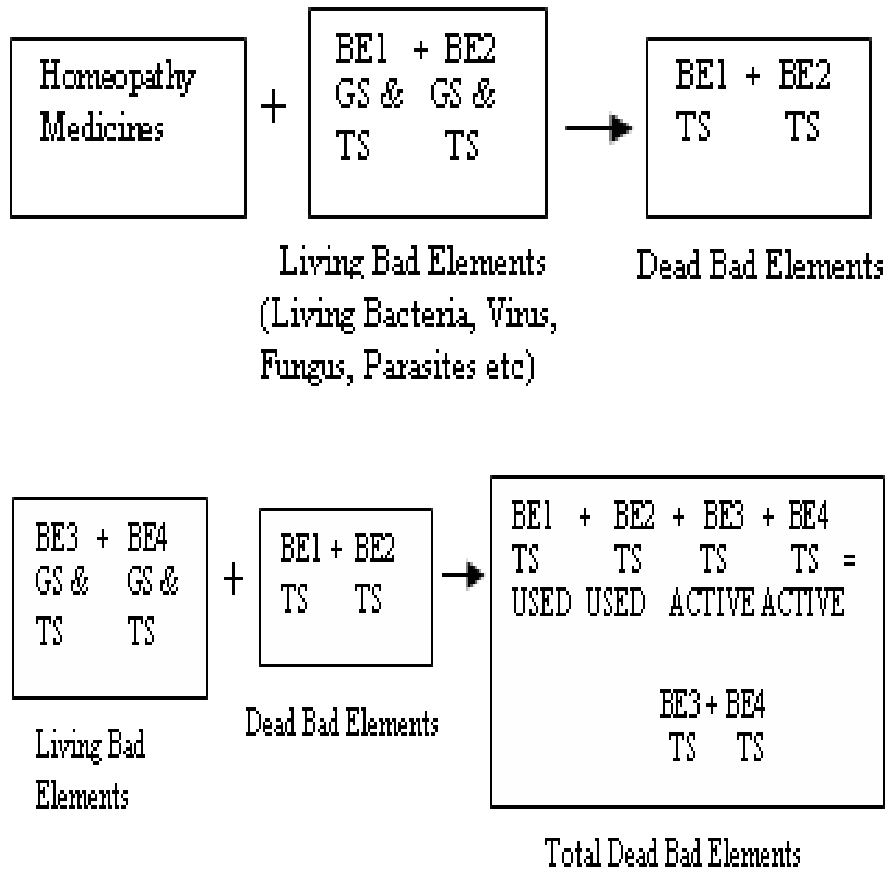

Fig. 2 Block diagram regarding activity of Homeopathic medicines and toxic substances produced by killing or throwing out bad elements acting on the patient.

Thus the Homoeopathic system causes least or nil side effect due to utilization of the toxic substances produced by the dead bad elements and applying least amount of medicines. Therefore the bad elements cannot gain potential, i.e., immunity to the medicines due to staying in normal condition. Hence there is no further recurrence of the disease happened in this system and the patient is completely recovered from the diseases.

#### IV. APPLICATION PHILOSOPHY FOR ALLOPATHIC, AYURVEDIC, HOMEOPATHIC, YOGIC MEDICINES

In Homeopathic system, the medicines and the toxic substances produced by killing of the bad elements (bacteria, virus, fungus, parasite) will take part jointly for further destruction of the living bad elements. It is having same nature like the chain reaction happened in a nuclear bomb or reactor. Thus, the last killing bad elements will bring forth the death of

next living bad elements and so on. Hence the residual toxic substances after death or throwing out the last number bad element remain very less, almost negligible amount and it cannot cause any malfunction of the other organs of the patient and also it acts as vaccine in future. This is a gradual or time consuming process, the patient has to wait for some time to get the full effect of Homoeopathic medicines, but in due course he will be completely cured. The main advantage of the application of Homeopathic school of medicines is that actually very small amount of medicines are required and there is no side effect either of the medicines or the toxic substances liberated by the bad elements in the disease affected person. At the same time it has also very rare chance of reoccurrence of that particular disease in short time, i.e., the disease is completely cured. The drawback of Homeopathic system is to select the particular medicine for the disease according to the symptom of the patient and his surroundings,

also the medicines are to be taken for a longer period till the last bad element killed or thrown out. Sometimes the patient has to wait some period to get the full benefit. Overall Homoeopathy school will assure the best result in medicinal field. The basic philosophy of Homeopathic medicines, are described here, certainly indicate the actual working nature of Homeopathic medicine in the living body. This working methodology of the Medicines is invented first time. This Homeopathy school of medicines has a complete difference with the working principle of Allopathic or Ayurvedic medicines, which are also explained in detail. Thus in Allopathic system of medicine, patient has to bear two side effects, one due to excess amount of medicines and the other is toxic substances produced due to throwing out or death of bad elements. Ayurvedic system is running on the same principal like Allopathic system.

In Physical Exercise, Yogic Exercise and Meditation etc., we are killing or throwing out some bad elements (bacteria, virus, fungus, parasite etc.) by implying pressure and by impinging more oxygen to blood producing oxy-hemoglobin, which enhances blood force or action power. As a result toxic substances are liberated by the death or throwing the few bad elements and it takes part for further killing or throwing out the rest bad elements like chain reaction. Finally disease free condition is achieved in a living body. Thus a living body sustains longer period without any disease by practicing these Exercises and Meditation methods.

#### V. PERFECT SCHOOL OF MEDICINES DESIGN

We see that the great physicians such as Dr. Hahnemann, Dr. Kent, Dr. Allen, Dr. Clarke, Dr. Ringer, and Dr. Borick, all belonging to the Allopathic system of medicines in their first life, turn to Homeopathic school and develop different type of Homeopathic medicines and applied methodology. They understand the urgent necessity of this area and they express that the disease can be completely cured by the application of Homeopathic system of medicines only.

Lastly it should be our motto for searching of the best school of medicines such that the disease can be cured completely with no further occurrence and causing the least side effects or nil side effects within a real time basis, i.e., within a stipulated time. This is only possible in philosophy adopted by Homeopathic school of medicine. A new school of medicines named "Perfect School of Medicines" is proposed in this paper. Perfect School of Medicines is to optimize the medicines at each moment, i.e., to determine the minimum quantity of requiring medicines in each moment before taking the medicines (or at least once in a day) in accordance with the living bad elements (bacteria, virus, fungus, parasite) and toxic substances due to killing or throwing the bad elements in the patient. Simply, we can conclude that the quantities of requiring medicines have to be decreased according to the progress of recovery from the disease to a patient for implementing Perfect School of Medicines philosophy. Thus Perfect School of Medicines brings forth a joint advantage of

all system of medicines and signs with a glory in the field of medicines incoming days.

#### VI. DIAGNOSIS OF A DISEASE WITH MEASUREMENT OF EXISTING LIVING AND DEAD BAD ELEMENTS IN A LIVING BODY

After intake of medicines like antibiotic and other drugs to a disease affected person called patient, the bad elements (bacteria, virus, fungus, parasite etc.) are killed or thrown out from the patient's body. As a result dead body of the bad elements are producing toxic substances which are used for further killing or throwing out of living bad elements as per philosophy of Perfect School of Medicines. Therefore an instrument is designed to measure the quantity of living bad elements and dead bad elements present in the patient's body at any moment. This instrument is worked out passing electromagnetic [EM] wave signal under certain frequency (say within 820 MHz to 960 MHz, i.e., frequency range used for mobile communications in India) through either patient's whole body or some portion, i.e., disease affected portion of the body and measuring the power of the electromagnetic wave signal [3]-[5].

Now-a-days we are surrounding by electromagnetic [EM] wave due to mobile phone system and other communications system like TV, Radio etc., so there is no necessity to generate or transmit EM wave separately. Electromagnetic [EM] wave with a certain frequency strength or power in dBm (or other smaller unit) going in and coming out from the patient's body is measured by a microwave power meter, but electromagnetic [EM] wave coming from the patient's body is caused interference by other EM waves surrounding the medium. Therefore in case of measuring the amount of EM wave absorbing by a living body (full body), the other EM waves in the medium are blocked by multilayer foam or water or rubber or special materials manufactured by Eccosorb with forming anechoic chamber [3]-[5]. For measuring the EM wave absorbed by an organ or a portion of the body, a micro anechoic chamber with jelly placing on the portion of the body is connected to the microwave power meter through radio frequency (RF) cable.

Generally under normal condition a living body absorbs certain quantity of electromagnetic [EM] wave having with a fixed frequency, i.e., his/her normal organ has able to absorb certain quantity of EM wave with a specific frequency. While in diseased condition, this quantity of electromagnetic [EM] wave absorption will change obviously. Therefore diagnosis of a disease appearing in a living body can be determined by measuring the amount of EM wave absorption, i.e., change of EM wave power from going in and coming out the living body or affected organ of the living body [3]-[5]. After taking medicines by the patient, the disease is going to recovery stage, the measurement of EM wave absorption by the patient's body or abnormal organ indicates how much living and dead bad elements are present, and accordingly medicines have to be reduced.

The amount of electromagnetic [EM] wave absorption having certain frequency by the patient gives a complete picture about the recovery of the disease. Therefore this electromagnetic [EM] wave absorption technique is eliminating the present costly pathological test procedures like blood, urine, stool, X-Ray, ultrasonography, scanning etc. examination for determining the status of the patient. From this electromagnetic [EM] wave absorption record of the patient, the doctor can take decision about the appearing diseases and easily select the proper amount of medicines which require for complete recovery, keeping in view the utilization of toxic substances from the dead body of the bad elements. Hence this is the simplest, the fastest and the cheapest technique to know the status of a living body in any moment. Thus Perfect School of Medicines can be smoothly implemented by applying this electromagnetic [EM] wave absorption examining technique.

#### VII. CONCLUSION

Perfect School of Medicines is the only way to recover the diseases completely with least side effect using minimum medicines as well as utilizing toxic substances produced by the death or throwing out of the bad elements (bacteria, virus, fungus, parasite) in a disease affected living being. If you apply the Perfect School of Medicines philosophy to a patient and Allopathic medicine philosophy to another patient, when both the patients are affected by the same disease with equal intensity, it is observed that the patient imposing on Perfect School of Medicines is not only become cured (normal) within lesser time than that of the patient applied on Allopathic school philosophy, but have more potential (energy) than the patient treated by Allopathic school.

Again lot of bad elements (bacteria, virus, fungus, parasite) cannot be killed or removed from living body for want of proper medicines or treatment like Cancer, AIDs, Malignant Malaria, Asthma and other vulnerable diseases etc. It is seen that these types of diseases are causing due to numerous type of bad elements (bacteria, virus, fungus, parasite), general medicines like antibiotics cannot be manufactured for their treatment. By applying Perfect School of Medicines philosophy, these types of non curable diseases can also be cured within short times.

Generally in blood, stool, urine, cells etc. of the non-curable disease affected (like Cancer, AIDs, Asthma etc.) living patient contain lots of disease causing living bad elements, then the living bad elements are collected from the disposals (blood, stool, urine, plasma, cell etc.) of the patient and are killed either by high temperature and high pressure treatment in a closed chamber or high voltage (electric shock) sparking or some chemical treatment. Then the dead body of the bad elements (bacteria, virus, fungus, parasite) having toxic substances are fed (drunk or injected) to the patient. The patient will be cured because of the living bad elements are killed or thrown out by the toxic substances of the dead bad

elements. By applying this technique, no medicines are required to cure a patient from the affected dangerous diseases. It is also called a self recovery technique by utilizing the toxic substances derived from the dead body of the bad elements.

By implementing this process, a new emerging Philosophy of Medicines is explored which is delighted with the name "Perfect School of Medicines". Here the requirement of the medicines is not only cut short, but at the same time a complete disease free condition is prevailed in living beings. Therefore in this paper working philosophy of all type of Medicines with an eye to Perfect School of Medicines has been intended in a new way.
